Heating Tower WT-58	
Presentation levels	4
Presentation area	0,97 m ²
Outside dimensions (in mm)	
Width x depth x height	580 x 770 x 1840
 Performance data	
Power input	2,34 kW
Voltage	230 V 50 Hz

The Highlights

Mirror effect: Back wall made of reflective sheet metal for visual multiplication of the selection of food and for optical expansion of the sales area.

LED lighting: Brilliant display case lighting for an attractive product presentation. Long-lasting, heat-resistant LED lighting with natural colour reproduction on all presentation levels ensures good and energy-saving illumination of your products.

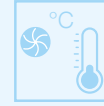

Manual night roller blind: Perfectly protected. Integrated manual night roller blind in a practical roller blind box. Incremental settings, mounted on the glass cover for optimum energy savings outside the shop opening hours.

Easy Clean: Optimum cleaning and the best-possible hygiene thanks to rounded corners and a glass cover that can be raised up.
