

## Technical Description

- Grab & Go display case for presentation of a changing range of food – easy handling, fast stocking and flexibility in its use
- Hot and cold area as well as neutral presentation in one unit on a minimum footprint – four different levels
- Hot area: Two presentation levels made of black glass with underlying hotplate and supporting heat per level for keeping the food perfectly hot
- Cold area: Two air-curtain cooled sales levels; bottle slider system on the bottommost sales level including variable hook-in frames for adaptation to different bottle dimensions
- Fully automatic condensate evaporation for self-contained model; condensate drain required on-site for remote refrigeration; condensate tray as an option
- High transparency for a perfect view of the selection of food
- Back wall made of reflective sheet metal
- Long-lasting LED lighting with natural colour reproduction at each level
- Made of high-quality stainless steel type 1.4301
- With refrigerant R134a
- Option for a surcharge: Service station including partitions, e.g. for disposable tableware and serviettes; integrated manual roller blind as a night cover

Subject to change without notice

		Convenience Tower 80-E
Presentation levels		4
Presentation area, cold		0,60 m <sup>2</sup>
Presentation area, hot		0,56 m <sup>2</sup>
Refrigerant		R134a
<b>Outside dimensions</b> (in mm)		
Width x depth x height		800 x 800 x 1600
 <b>Performance data</b>		
Power input		2240 Watt
Voltage		230 V 50 Hz

## The Highlights

**Combination unit:** Practically combined. Diverse range of products with small footprint. Compact unit solutions with different temperature ranges combined in one unit. Easy handling and impulse buying guaranteed.

**Mirror effect:** Back wall made of reflective sheet metal for visual multiplication of the selection of food and for optical expansion of the sales area.

**LED lighting:** Brilliant display case lighting for an attractive product presentation. Long-lasting, heat-resistant LED lighting with natural colour reproduction on all presentation levels ensures good and energy-saving illumination of your products.

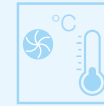

**Easy Clean:** Optimum cleaning and the best-possible hygiene thanks to rounded corners, removable bottle slider and a glass cover that can be raised up.

### TEMPERATURE RANGE

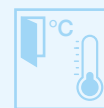

**AIR, COLD**  
+5 °C

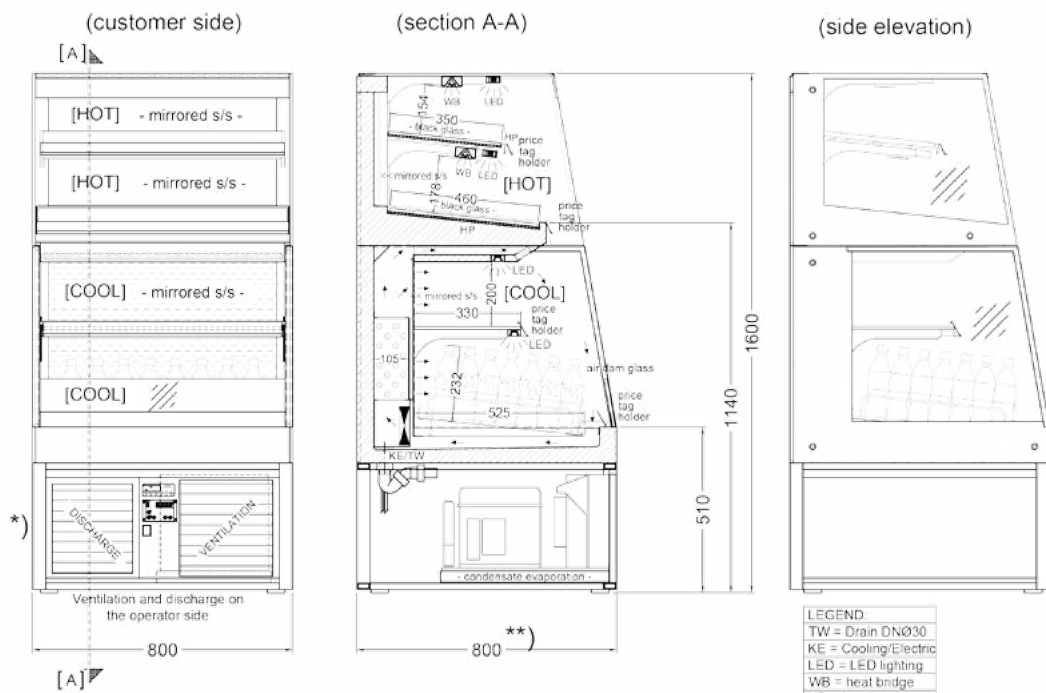

**PRODUCT, HOT**  
> +65 °C

**PRODUCT, COLD**  
M2: -1 °C to  
+7 °C

**ROOM**  
+25 °C and  
60% rh

\*) Model incl. service station: Ventilation on left side, discharge of warm air on rear

\*\*) Model incl. Service station with a depth of 880mm (additional 80mm wide duct for discharge of warm air on rear)
