

The Highlights

Combination unit: Practically combined. Diverse range of products with small footprint. Compact unit solutions with different temperature ranges combined in one unit. Easy handling and impulse buying guaranteed.

Mirror effect: Inside made of reflective sheet metal for visual multiplication of the selection of food and for optical expansion of the sales area.

Fresh preparing: Perfect freshness. Stocking of cold as well as hot food and ingredients under the pull-out cutting boards for day-to-day operations as well as for individual customer requests.

Easy Change: Slide-in front glass, therefore it can be used optionally as a service or self-service display case – in one simple step and without a tool.

Automatic programs: With 7 different automatic programs, perfect results are pre-programmed. Depending on whether you want to keep fish, meat, vegetables or any other food hot in your heated display cases, you can do so with ease thanks to the 7 pre-defined programs.

Supporting heat: Radiant heat from infrared heating. The heat that is guided from top to bottom provides a supporting effect for assurance of the optimum surface temperature and core temperature of your products.

Easy filling: Conscious reminder. Our heated display cases remind you visually and acoustically every three to four hours to top up the water. Practical filling of the water tray completely without having to remove the product.

LED lighting: Brilliant display case lighting for an attractive product presentation. Long-lasting, heat-resistant LED lighting with natural colour reproduction on all presentation levels ensures good and energy-saving illumination of your products.

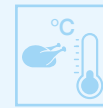

Easy Clean: Optimal cleaning and best-possible hygiene thanks to rounded corners on the inside of the units, slide-in front glass, glass cover that can be raised and lift-up evaporator.
